**Efficient,
Reliable service
ensuring
maximum
funding is spent
on quality food**

C

Ongoing review.
Changes when required can be made with a simple phone call to John or Jill and implemented instantly

BRADBURY'S SCHOOLS HAVE THEIR SAY!

A principal of a Leinster school had the following to say on changing over from another large supplier:

“It’s just so much easier to work with Bradbury’s, their school meals system really works, we have never had any hassle, ever, nothing is too much for John and his team. We were anxious enough before switching over from another large supplier and I really had to sell it to the staff who were happy enough at that stage.

However we have only been delighted with Bradburys and the service given, it was just so easy to implement the transfer over and I have no regrets at making the change-over and we definitely won’t be going back to the previous system or provider, no way, so much less hassle.

All the little things make a difference, they collect the rubbish (which is all re-cycled) which is so much easier, they do everything we ask them, it’s just so much less time-consuming, less administration, they have never missed a delivery and are always on time after 2 full years. It also is great to have such flexibility in ordering and delivery times, they are so easy to communicate with and are always available, it helps to be dealing with such an established family business, they change things at a days notice, it helps to deal with the boss as he can make decisions and act on them immediately.

The food is excellent, with better variety, just excellent healthy food with the odd treat, plenty of options and their system gives the children a surprise, they also provide for our homework club.

I think it’s a much better idea not to have the names on the package, having tried both ways; its hard to know what you want for lunch tomorrow, let alone next week! This way ensures the children get variety and really healthy options. It also helps to actually see the food, so you know what you are getting, the packaging makes sense.

We would recommend them to any school that wanted to save time and it really adds up over a school year, the quality of the Bradbury’s service is really the difference and as all our teachers are so busy already we appreciate how easy they make it.”

“The Bradbury’s service is really the difference.”
